

Data Analyst on Dorozea's chat about 7tv emotes usage

I did this project as part of my data analytics studies to explore what insights can be derived from chat data. The data comes from **55** streams recorded between **May 1** and **July 3** *. I believe there are too many unnecessary 7TV emotes, and it would be worthwhile to filter them out.

*Chat logs are post streams so timeout users and deleted messages are not in it, and no offline chat.

Interesting stats

From **4240** unique chatters **2747** of them used 7tv. **64.79%** use 7tv
150 085 messages have been sent, **71064** of which contained 7tv emotes. **46.73%**
